 New Java Project

Create a Java Project

Discouraged module name. By convention, module names usually start with a lowercase letter

Project name:

Use default location

Location: C:\Users\srija\eclipse-workspace\First_Project

JRE

Use an execution environment JRE: JavaSE-21

Use a project specific JRE: jdk-21

Use default JRE 'jdk-21' and workspace compiler preferences

Project layout

Use project folder as root for sources and class files

Create separate folders for sources and class files

Working sets

Add project to working sets

Working sets:

Module

Create module-info.java file

Module name:

Generate comments

module name will be "First_Project" (if no module is specified, then project name will be used as module name)

eclipse-workspace - Eclipse IDE

New Ctrl+N
Open Type Ctrl+Shift+T

Problems Declaration Console X

No consoles to display at this time.

The image shows two instances of the Eclipse IDE interface side-by-side, illustrating a Java application's state at different stages or configurations.

Left Window (eclipse-workspace - First_Project/src/mypackage/Sample.java - Eclipse IDE):

- File Explorer:** Shows the project structure with a package named `mypackage` containing a class `Sample`. The `Sample` class has a main method that prints "Hi, Welcome to my world!" to the console.
- Code Editor:** Displays the `Sample.java` file with the following code:

```
package mypackage;
public class Sample {
    public static void main(String[] args) {
        // TODO Auto-generated method stub
        System.out.println("Hi, Welcome to my world!");
    }
}
```
- Outline View:** Shows the declaration of the `main` method in the `Sample` class.
- Problems View:** Shows no errors or warnings.

Right Window (eclipse-workspace - First_Project/src/mypackage/Sample.java - Eclipse IDE):

- File Explorer:** Shows the same project structure as the left window.
- Code Editor:** Displays the `Sample.java` file with the following code:

```
package mypackage;
public class Sample {
    public static void main(String[] args) {
        // TODO Auto-generated method stub
        System.out.println("Hi, Welcome to my world!");
    }
}
```
- Outline View:** Shows the declaration of the `main` method in the `Sample` class.
- Problems View:** Shows a warning: `Detected: Sample [Java Application] C:\Program Files\Java\jde-21\bin\javaw.exe (05-Apr-2024, 5:41:0pm - 5:41:11pm) [pid: 7500]`.
